VELO

I N O X S E R I E S

High resistance and durability. Long -life and anticorrosive material.

Grab bars and shower seats **equipped** with nonconductive kit and fixing materials.

Full range suitable for the use requirements of all the adapted bathroom equipment: toilet pan, wash basin, shower and bathtub.

VELO manufactures all type of grab bars and technical aids of AISI 304 Stainless steel in different finishings. **We have all the means to manufacture** cutom made grab bars.

We have, on request, AISI 316 Stainless steel grab bars **suitable for all type of environments** with aggressive ambient conditions.

NYLON SERIES

Anticorrosive aluminium inner core with antibacterial Nylon coating.

Made of aluminium core with Stainless steel wall brackets and 4 mm thick Nylon coating which gives the bar high resistance and durability. This is essential for the good maintenance of the external and internal parts of the grab bar.

The Nylon coating is produced from powder format polymers enriched with highly effective **bactericidal additives**, added during the forming process.

Proven bactericidal effectiveness against the more threatening bacteria in hospitals and medical centers such as: Escherichia coli, Salmonella enteritides, Staphylococcus aureus and Listeria monocytogenos.

The bacterial reduction has led to the **99,9%** reduction within the following 24 hours, being reduced to less than the 5% at the first 2 hours.

There is a **full range** counting with all the typologies that you may need: straight bars, angled bars, swing-up bars, reinforced, with floor supports, or shower, shower seats, handles, etc.

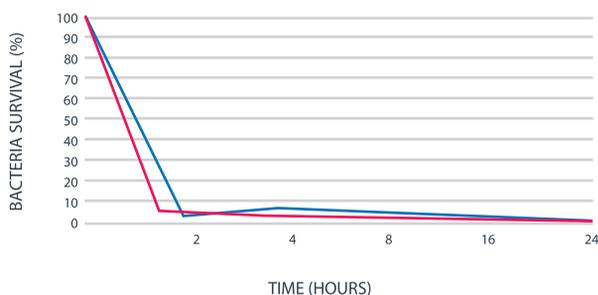

Non-conductive material: no earth grounding means required.

Comfortable touch, **non-slip**.

Fixing materials included.

The bactericidal properties and the soft and warm finish make the new VELO Nylon Series **the best choice** for the healthcare and hospital environment.

99,9% bacterial reduction within the following 24 hours, being reduced to less than 5% at the first 2 hours.
